Press Release RideOnTrack

Geel, Belgium – September 9, 2013

RideOnTrack wins the Infrabel RFQ for the Nationwide Voice Recording and Play-Back solution.

RideOnTrack is pleased to announce it is awarded by Infrabel for the Nationwide Voice Recording and Play-Back solution.

Early 2013, Infrabel launched an RFQ for the renewal of their nationwide Voice Recording and Play-Back solution. The existing legacy system was no longer able to cope with the requirements of Infrabel in terms of recording and storage capabilities, play back functionalities and the required footprint and power consumption.

RideOnTrack launched its new Voice Recording and Play-back solution in 2012 and decided to bid for the Infrabel RFQ. After the bid evaluation, RideOnTrack was ranked as most compliant bidder, and as per bidding process, was invited for a Proof of Concept (PoC). After the successful PoC during the late summer of 2013, RideOnTrack was awarded the contract.

The contract consists of a fully Geo-redundant recording and Play-back solution. The system connects to the many legacy systems in use at Infrabel (e.g. TDM CAS and GSM-R ISDN U2U) as well as to the new SIP-network devices. The solution needs to be able to record up to 1,000 simultaneous calls and need to record up to 50,000 calls per day. The Web-based Play-Back tool can be used on any PC connected to the Infrabel network given the fact that they have the appropriate access rights.

The Voice Recording and Play-Back solution needs to be in service by the end of 2013.

and development environment allows to address specific customer needs in a niche market environment.

RideOnTrack bvba is a privately held company under Belgian law.

About Infrabel

Infrabel is the state-owned company that develops, maintains and operates the Belgian railway network. Thanks to its highly skilled employees and tried-and-tested technology, Infrabel offers a customer service centred on the travellers' present and future mobility needs.

Infrabel aims to become the crossroads of Europe thanks to its safe and high-quality railway network. Infrabel wants to keep developing into a strong link in a sustainable transport system. In this way Infrabel aims to continue to support the economic and social development of Belgium and Europe.

Infrabel's responsibilities in a nutshell:

- Maintaining and renewing the railway infrastructure: tracks, overhead lines, signalling system, etc.
- Expanding the railway infrastructure in response to mobility requirements
- Directing and coordinating all trains on the Belgian railway network
- Operating the railway infrastructure and allocating the available capacity to our customers, the railway undertakings
