

About RideOnTrack

RideOnTrack is a Belgian company specialized in delivering state-of-the-art communication solutions for mission critical networks. RideOnTrack has developed its own software platform, supported by software development tools and software/system test solutions. This results in drastically reduced software design cycles while maintaining the highest quality standards.

RideOnTrack differentiates in that its set-up, experience and development environment allow it to address specific customer needs in the fixed Operational Communication market. At RideOnTrack we consider ourselves technology front runners. Among others, RideOnTrack can provide Gateway solutions, Voice Recording & playback, VOIP Fixed Operational Telephony and Dispatcher solutions.

In order to keep track with the fast company growth and in order to implement all the work at hand, we are now looking for a C++ Software Development Engineer.

C++ Software Development Engineer
